

INFORMATION AND COMMUNICATION TECHNOLOGY DEPARTMENT			
SESSION	: 2 2022/2023		
COURSE	: DFP40203 - PYTHON PROGRAMMING		
CONTINUOUS ASSESSMENT		: LABORATORY TASK 3	Total Marks: 30
TOPIC	TOPIC 4: FILES AND DIRECTORY HANDLING 4.1 Understand Files. 4.1.1 Write and Read text to/from Files 4.2 Understand Exception		
CLO	CLO1: Construct Python application based on a given scenario (P4, PLO3)		
NAME	MUHAMMAD REDZUAN BIN PARSIKUN	REG. NUMBER	03DDT21F1005

Instruction: Answer all question

1. Write a program to read data from a user's input text file (webinar.txt) and display the memo in the console.
2. Then write the output in the output text file (Answer.txt).
3. Apply exception in your program to handle FileNotFoundError (Figure 1).

```
In [1]: runfile('E:/PnP 2022 2023 2/DFP40203/Assessment/LAB TASK 3/Lab Task 3.py', wdir='E:/PnP 2022 2023 2/DFP40203/Assessment/LAB TASK 3')
Traceback (most recent call last):

  File "e:\pnp 2022 2023 2\dfp40203\assessment\lab task 3\lab task 3.py", line 2, in <module>
    readFile = open("webinar.txt", 'r')
FileNotFoundError: [Errno 2] No such file or directory: 'webinar.txt'
```

Figure 1: FileNotFoundError

4. Output examples as shown in Figure 2

```
In [1]: runfile('E:/PnP 2022 2023 2/DFP40203/Assessment/LAB TASK 3/Lab Task 3.py', wdir='E:/PnP 2022 2023 2/DFP40203/Assessment/LAB TASK 3')
Selamat sejahtera dan salam Malaysia Madani buat seluruh warga PolyCC.

Jemputan menghadiri
WEBINAR MALAYSIAN POLYTECHNIC & COLLEGE COMMUNITY SUSTAINABILITY AWARD 2023 (MPCCSustAWARD 2023) SIRI 2

Platform WEBEX : shorturl.at/BCFU8
Tarikh : 12 April 2023
Masa : 9.45pg - 1 ptg
Tema : Environmental Sustainability : Challenges & Solution for Better Future

*Penyertaan adalah Percuma*
*Sijil digital disediakan untuk semua peserta*
*Rujuk poster untuk maklumat lengkap*

```

Figure 2: Output Examples

5. Input file and output file as shown in Figure 3.

 Answer.txt	4/16/2023 8:12 AM	Text Document	1 KB
 webinar.txt	4/16/2023 8:08 AM	Text Document	1 KB

Figure 3: The Input File (webinar.txt) and Output File (Answer.txt)

6. Output file as shown in Figure 4.

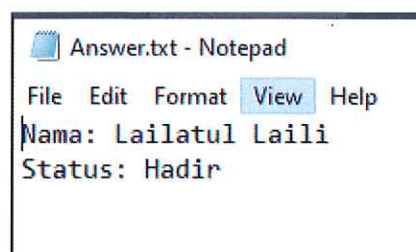

Figure 4: Output File (Answer.txt)

REPORT SUBMISSION:

Submit in ONE (1) folder

1. Report (.pdf file) – Screenshot coding, output and text file
2. coding (.py file)
3. input and output text file (.txt file)

**INFORMATION AND COMMUNICATION TECHNOLOGY
DEPARTMENT**

SESSION	: 1 2022/2023
COURSE	: DFP40203 - PYTHON PROGRAMMING

CONTINUES ASSESSMENT : LABORATORY TASK 3

TOPIC	TOPIC 4: FILES AND DIRECTORY HANDLING 4.1 Understand Files. 4.1.1 Write and Read text to/from Files 4.2 Understand Exception
CLO	CLO2: Construct a working program by using Python programming elements to realise a computer program with debugging technique. (P4, PLO2)

ANSWER RUBRIC

Mark	0 Mark	1 Mark	2 Mark	3 Mark	4 Mark	5 Mark
Python programming structure	The program has not apply the coding standard guidelines.	Weak in applying Python programming structure	The program has quarterly apply the coding standard guidelines.	The program has partially applied the coding standard guidelines.	The program has apply the coding standard guidelines.	The program is excellent in applying the coding standard guidelines.
Read File	There is no read file function in the code	The read file function can read only 20% line of data.	The read file function can read 40% lines of data without proper layout	The read file function can read 60% lines of data with proper layout	The read file function can read 80% lines of data with proper layout	The read file function can read all the lines of the data with proper layout
Write File	There is no write function in the code	The write function can write only 20% data in the code.	The write function can write 40% correct input into the text file	The write function can write 60% correct input into the text file	The write function can write 80% correct input into the text file.	The write function can write all the data correctly into the text file.
Exception Handling	There is no exception handling is the codes	Incorrect exceptions were inserted in the code.	The exceptions were inserted but only 20% of it works.	The exceptions were inserted but only 50% of it works.	The exceptions were inserted but only 80% of it works.	The exception is being handled properly in the codes.
Output and Report	No output Display and no report submission	The output display incorrectly and report untidy	The output display with minor error and reported	The output display correctly and average reported	The output display correctly and good reported	The output display perfectly and reported excellently
Timeliness	No submission	Late 7 days and more	Late 2 to 6 days	Late 1 day	After time but on same day	Follow the time given
