Title : SimpleTextEditor / Import Module tkinter

1. Coding

```
1  # -*- coding: utf-8 -*-
2  """
3  Created on Tue Apr 18 14:47:02 2023
4
5  @author: user
6  """
7
8  import tkinter as tk
9  from tkinter.filedialog import askopenfilename, asksaveasfilename
10
11 def open_file():
12     #open a file for editing
13     filepath = askopenfilename (
14         filetypes = [("Text Files", "*.txt") , ("All Files", "*.")]
15     )
16     if not filepath:
17         return
18     txt_edit.delete(1.0, tk.END)
19     with open(filepath, "r") as input_file:
20         text = input_file.read()
21         txt_edit.insert(tk.END, text)
22     window.title(f"Simple Text Editor - {filepath}")
23
24 def save_file():
25     #Save the current file as a new file
26     filepath = asksaveasfilename(
27         defaultextension = "txt", filetypes=[("Text files" , "*.txt"),("All Files", "*.")]
28     )
29     if not filepath:
```

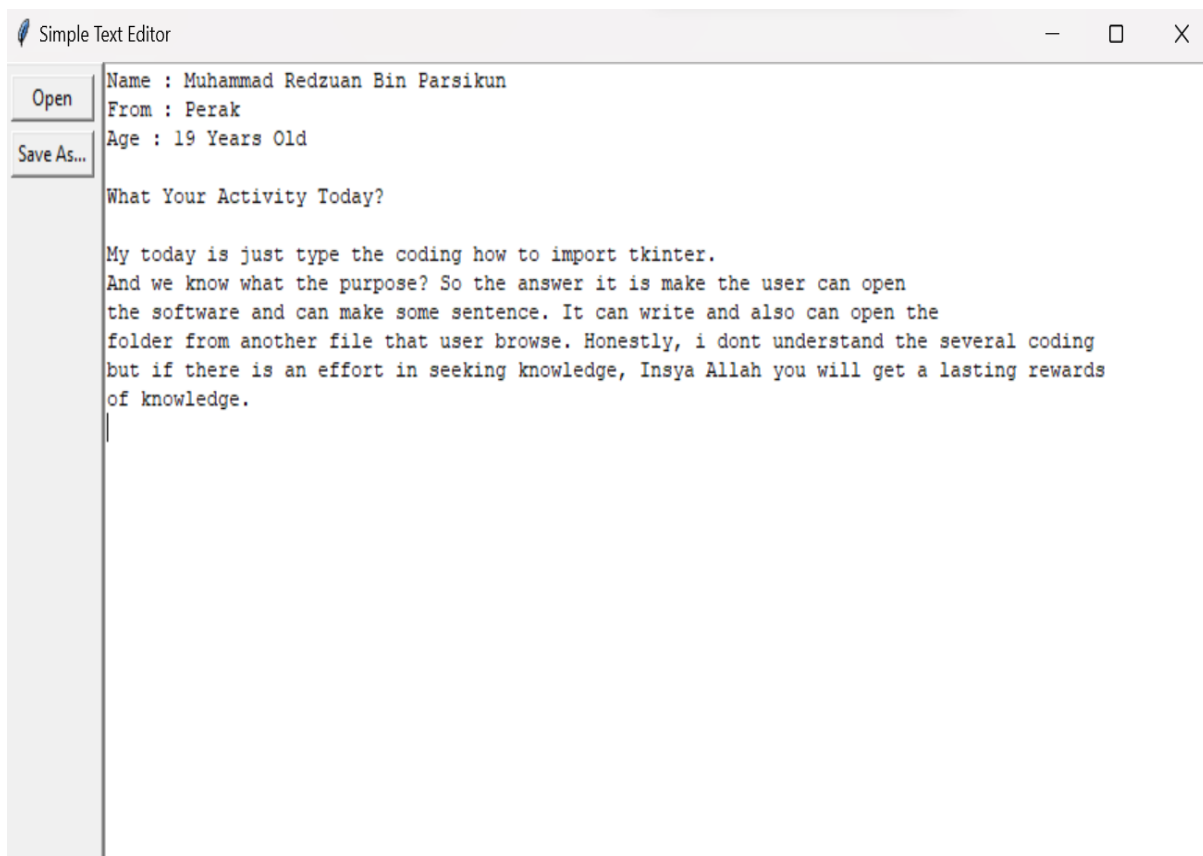

```

30         return
31     with open(filepath, "w") as output_file:
32         text = txt_edit.get(1.0, tk.END)
33         output_file.write(text)
34         window.title(f"Simple Text Editor - {filepath}")
35
36 #Create the widgets
37 window = tk.Tk()
38 window.title("Simple Text Editor")
39 window.rowconfigure(0, minsize=800, weight=1)#0, which sets the weight of
40 window.columnconfigure(1, minsize=800, weight=1)#set the width and weight
41
42 txt_edit = tk.Text(window)
43 fr_buttons = tk.Frame(window, relief=tk.RAISED, bd=2)
44 btn_open = tk.Button(fr_buttons, text="Open", command=open_file)
45 btn_save = tk.Button(fr_buttons, text="Save As...", command=save_file)
46
47 btn_open.grid(row=0, column=0, sticky="ew", padx=5, pady=5)#padx and pady
48 btn_save.grid(row=1, column=0, sticky="ew", padx=5)
49
50 fr_buttons.grid(row=0, column=0, sticky="ns")
51 txt_edit.grid(row=0, column=1, sticky="nsew")
52
53 window.mainloop()
54

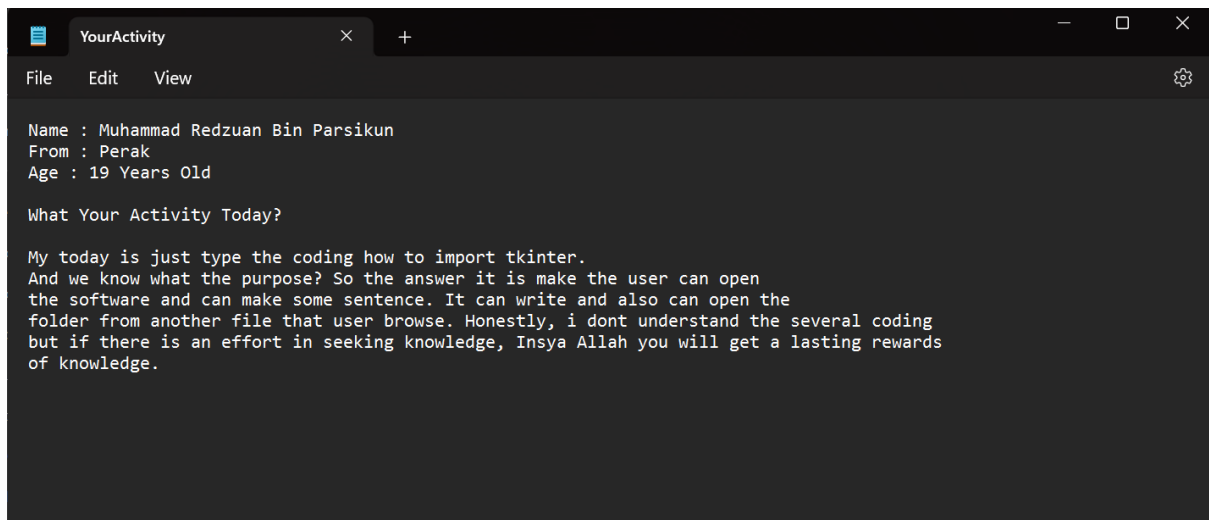

```

2. Output

Write or Read After Save As

Read after Save As “YourActivity.txt” and open at Notepad

The image shows a Notepad application window with a dark theme. The title bar at the top reads "YourActivity" and includes standard window controls (minimize, maximize, close). Below the title bar is a menu bar with "File", "Edit", and "View" options. The main text area contains the following content:

```

What Your Activity Today?

My today is just type the coding how to import tkinter.
And we know what the purpose? So the answer it is make the user can open
the software and can make some sentence. It can write and also can open the
folder from another file that user browse. Honestly, i dont understand the several coding
but if there is an effort in seeking knowledge, Insha Allah you will get a lasting rewards
of knowledge.
```
